

Advanced VBA

With a project based approach you can take your VBA skills to another level. We will build a GUI loan management application in Excel VBA.

Required Worksheets

The following worksheets must be created to host the data. The application relies on the names of the worksheets so incorrect naming might cause some runtime errors.

- user
- user_level
- dirty_client_info
- pmt_receipt
- user_logon_logoff_TS
- client_info_personal
- client_info_contact
- client_info_business
- client_info_family
- client_info_other
- loan_list
- loan_payment
- loan_discount
- loan_delinquency
- client_message
- loan_delinquency_by_schedule
